Small Group Scenario Trainer

Small Group Scenario Trainer

SGST is a distributed, Web-based training application that extends the distributed learning capability beyond an individual focus, to serve members of teams and staffs that need not only individual training but small group collaborative training focused on staff interaction and processes. SGST is designed to support distributed exercise execution where participants are physically separated and dependent upon Web-connectivity to enable the communications and collaboration to achieve exercise objectives.

SGST uses scenario simulations and interactive capabilities to stimulate critical thinking as players address problems encountered during virtual sessions. Participants apply basic joint operations skills using SGST to collaborate and solve problems, forming as a team in reacting to realistic interfaces and injects that introduce new information as the scenario simulation unfolds. SGST has built-in file sharing and video viewing to aid collaborative staff processes and procedures. The SGST framework enables users to create or modify scenario content or reuse existing scenarios. An extensive library of SGST scenarios is available for tailoring to area-specific and mission-specific training objectives.

Getting Started:

NIPRNet: Register for SGST Account by entering <https://sgst.jten.mil/web>, select "**I Accept**" to acknowledge terms and conditions of use, and select the "**Register with CAC**" or "**Register without CAC**" link. Registration is allowed with or without credentials; both links will display registration page. Complete the form and select the "**Register**" button at bottom of page. This action will submit the registration information to an SGST Systems Administrator for review / approval. Return to <https://sgst.jten.mil/web> and login with CAC or user name and password.

SIPRNet: Register for SGST Account by entering <https://sgst.jten.smil.mil/web>, select "**I Accept**" to acknowledge terms and conditions of use, and select the "**Register without CAC**" link. Complete the form and select the "**Register**" button at bottom of page. This action will submit the registration information to an SGST Systems Administrator for review / approval. Return to <https://sgst.jten.smil.mil/web>, and login with user name and password.

Step 3: Begin SGST exercise by selecting appropriate button in the Lobby Assistant window; "**Join an Exercise**," "**Manage an Exercise**," or "**Build and Exercise**" depending on your role. Follow prompts through the Lobby Assistant to quickly join, manage or build an exercise.

About JKO

Joint Knowledge Online is the DoD authoritative distributed learning capability for military and civilian individual and staff online training. It is the Joint Staff system of record for joint training requirements. Joint, Interagency, Inter-government and Multinational Stakeholders use JKO for a cost efficient, distributed learning solution to meet their training requirements. Our team of advanced distributed learning technology, instructional system design, and training professionals develops, delivers, tracks and reports web-based training on JKO. We develop media-rich, interactive courses, tailored scenario simulation applications, and train others to fully leverage JKO to manage their unique, online training requirements.

JKO Features

- 24/7 global distributed access on military unclassified and classified networks and mobile devices.
- Software-hardened learning content management system.
- Web-based JKO Course Builder courseware development tool with HTML5 capability.
- Roles-based access enabling segmented user views of JKO course database.
- Level 2 and above Interactive Multimedia Instruction courses.
- SCORM compliant courseware development, conversion and hosting.
- Area of operations and tailored scenario simulation immersive training applications.
- Distributed, desktop small group exercise training.
- Free JKO Mobile app for iOS and Android mobile phone and tablet users.
